1. Introduction

1.1 General Overview

The Hunter Pass grants access to a community Alpha Group, designed for both new and experienced NFT investors. Our mission is to offer a convenient and cost-effective tool for our members to identify and evaluate top-notch NFT projects.
We are here to guide investors in the Ethereum and Bitcoin NFT ecosystems by exposing our pack to the most profitable drops.
With the dedication and enthusiasm of our members, we have established a reputation as a pack of unstoppable hunters in the NFT space, consistently discovering profitable opportunities.

1.2 The Hunter Pass

Access to our tools will be granted by The Hunter Pass, similar to other Alpha Groups. Yet, most Alpha Groups have the same design for all the passes in the form of a ticket. We want to stand out by creating an NFT collection that acts as the access pass to our tools.

A collection of 888 wolves.

We will draw an entire collection which acts as the access pass of the Alpha Group. 888 unique wolves will be generated from a pool of 70 hand drawn traits, including 3 legendary NFTs that hold the highest of value.

With this lower supply, we can keep our community exclusive and it will be easier for all of us to unite and form a family.

1.3 Our Mission

We are a team of developers that have worked in the web3 space and released over 70+ projects. We witnessed the evolution of web3 and came to the conclusion that there is a lot that is missing at the moment. This gap is not as visible for some creators considering most of the projects rely on the same ideas and platforms. That is when we spotted an issue in the web3 space and assembled a team to solve it. Luna Hunters is not only a NFT Project but rather a gateway to unseen potential and a first step to creating an immense ecosystem. It is a piece from a master plan meant to show the web3 world our implication and knowledge about the domain which will translate into a community that will gain consistent profits on trades. Furthermore, by owning a Hunter Pass you not only gain access to a highly efficient and converting Alpha Group, but to a whole network of developers, artists and promoters, including our team. Our mission is to create a family of powerful individuals that, when combined, will create an unstoppable force. We want our resources to be available to every holders from our loyal Pack.

2. Benefits

2.1 The Alpha Group

The Pack is our family and The Alpha Group is our home. By owning a Hunter Pass you will gain access to our exclusive Alpha Group designed to keep you ahead of the competition with various tools.

Call Channels

Everytime an opportunity appears, a member of our staff will call it immediately in such a manner that no holders misses out. Because of the team we have assembled, we have eyes on most relevant categories such as NFT Projects, crypto calls, Premint & Alphabot links and even ordinal calls when the right infrastructure is in place.

Automated Whitelist & Raffles

Each holder will be automatically whitelisted in projects we do collaborations with. Even if the projects allocates less spots than the amount of holders, we will raffle them based on the format "first come, first served". Periodically we will host raffles with rewards in ETH, NFTs & more in which every holder will automatically participate.

LaunchPad

The Alpha Group will host a LaunchPad section. Creators can request to submit their project to our community and together we shall decide if the project is worth it. Our goal is to help some Creators launch themselves in the web3 space in order to expand our networking capabilities even beyond our Alpha Group.

2.2 Staking

Staking is one of the utilities that stands at the roots of Luna Hunters. This is because it allows us to have loyal holders and it opens the gate to creating an entire ecosystem based around our gouvernance token called $Scraps.

**token name may vary upon release*

By staking the Hunter Pass each holder will earn 5 $Scraps/day. Each user will need $Scraps to navigate around our ecosystem which includes but is not limited to the Marketplace and the Hunter's Dao. This token holds various utilities such as getting whitelist spots from the marketplace, participating in premium raffles and even minting in partner projects.

2.3 The Marketplace

The Marketplace is our main platform for holders rewards where the gouvernance token $Scraps is spent. By utilizing collabs, different items will appears on the Marketplace such as whitelist spots and raffles from other projects.

The Marketplace is meant to extend the borders of the Alpha Group by inviting other creators to promote their projects. While The Alpha Group will remain closed and exclusive, the Marketplace will host multiple projects and will be open to the entire web3 world of Creators. We will use this to our advantage to extend our reach in the space and give other quality projects direct contact with us while filtering the unworthy ones.

2.3 The Hunter's DAO

The Hunter's DAO is an extension of the Alpha Group which is in tight connection with our Discord. The Hunter's DAO will allow holders to vote major decisions about the evolution of Luna Hunters.

Utility is not excluded. The Hunter's DAO will host various tools available only to our holders such as: FOMO Bot, Minting Now feed, Analytics, Alerts and more.

3. Analysis

3.1. Revenue Streams

First revenue stream will be from the mint of the Hunter Passes. This is a one time payment that will be redistributed into the development of Luna Hunters. Other extensions of the collection may occur by voting the decision in The Hunter's DAO.

Second revenue stream comes from our Marketplace. Creators will have to pay a fee to upload their collection to our Alpha Group and promote it among our members. Any paid advertising will be mentioned so every member can distinguish from an expert's call and a more risky paid call.

Creating other revenues streams will be voted by the holders depending on the evolution and cost of the platforms.

3.2. Mint Distribution

Mint Distribution covers how our funds will be allocated after the project is sold out. As seen below, development costs are the highest due to the quantity of utilities in Luna Hunters that are closely related to the Alpha Group. This is key to creating a stable ecosystem since that is be the main focus.

Partnerships with the best Alpha Callers, Trades, Early Callers

Marketing, Promoters, Collabs, Premint & Alphabot

Redistributed among team members

Community Wallet

Development for The Hunter's DAO, The Marketplace and the Alpha Group

3.3. Future & Expansion

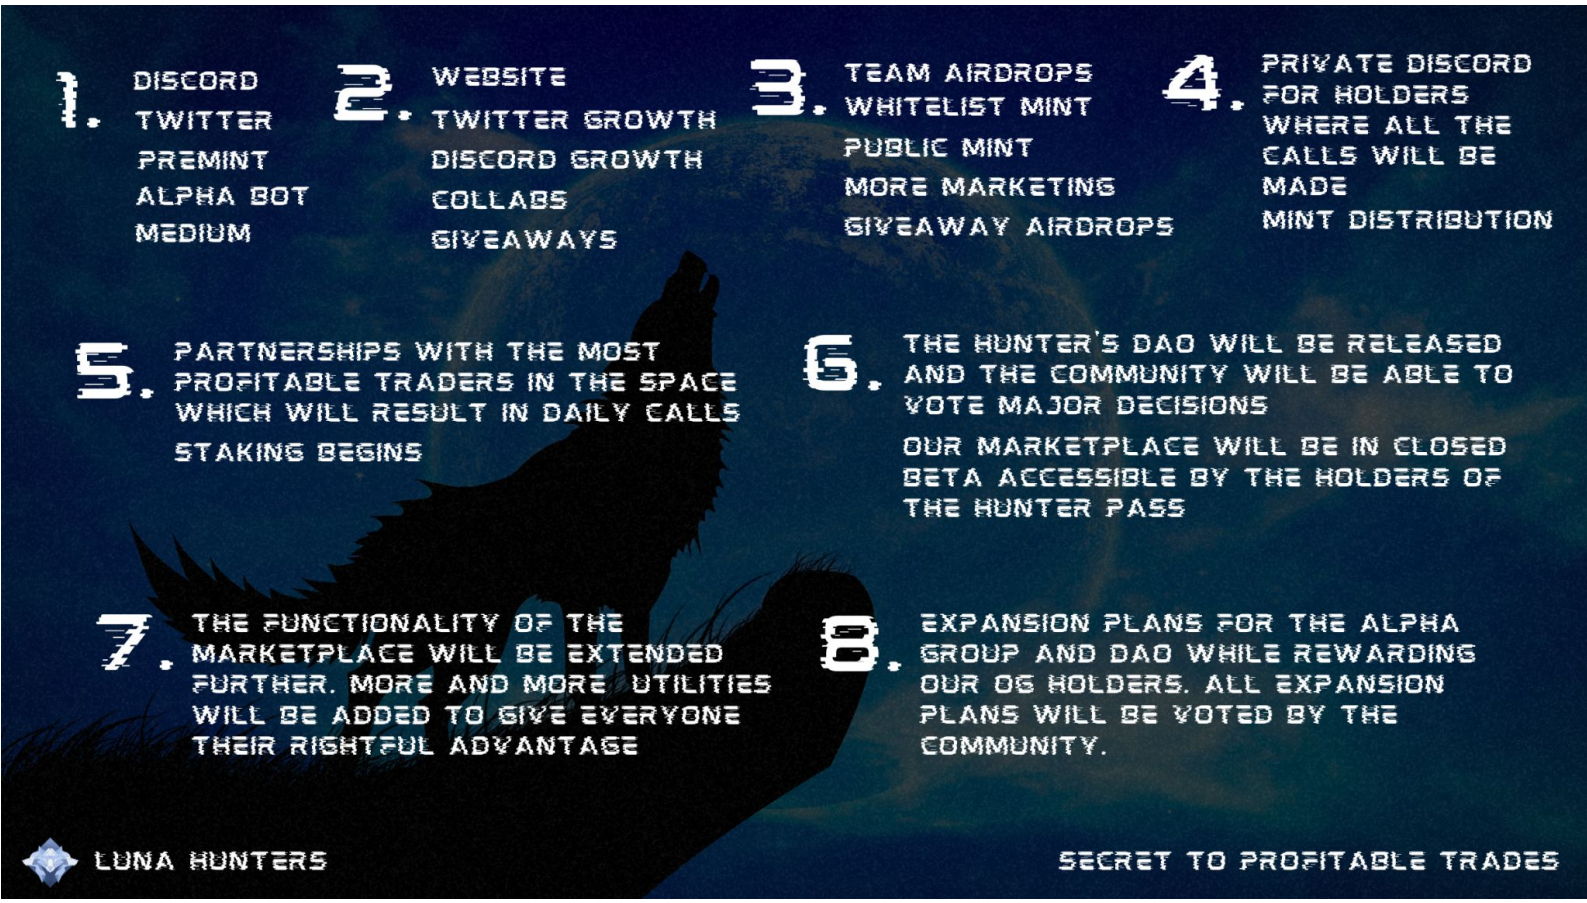
Considering the nature of the Alpha Group, most major decisions and expansion plans will be voted together with our holders. The team behind Luna Hunters has plenty of expansion plans that shall be discussed and revealed post mint.

Our main goal for the future is to create an airtight ecosystem, exclusive to our holders that will be impossible to penetrate. Creating a family is the key to achieving that goal. This system will offer consistent utilities and profits, together with networking opportunities and even job opportunities, all of this while encouraging a steady growth. We want to have a fearless reputation of predators that can achieve anything - thus the name Luna Hunters.

All is possible with well calculated steps, steady growth, a community which we can call family and the power of networking.

4. Roadmap

4.1. Goals & Targets



Post mint we will reveal sneak peeks and closed betas of our platforms in order for every holder to take part in the testing process. The core of each platform is already decided due to the development expertise of our team but any additional features shall be voted among our holders and any specific requirements shall be taken into account.

5. Team

We are a team of developers that worked in the space since the first wave of NFTs hit. We have developed multiple successful projects and observed many web3 gaps from the front row. We decided to take action in an effort to fill the gaps with our own tools that we know will shred the competition. We used all of our connections that we have obtained from past projects and formed an unstoppable team which we can now call family. We have multiple promoters, marketers, callers, traders and artists on board all working in a perfect harmony.
